WP-Optimize

https://wpdemo.net/demos/plugins/wp-optimize

WP-Optimize is a revolutionary, all-in-one plugin that cleans your database, compresses your images and caches your site.

Our cache feature is built around the world’s fastest caching engine. This simple, popular and highly effective tool has everything you need to keep your website fast and thoroughly optimized!

It does it in three clever ways:

- It allows you to clean and optimise your database.
- It gives you the option to compress your images.
- It allows you cache your pages, for super fast load times (read more caching information below).
