

Ace Login Block

<https://wpdemo.net/demos/plugins/acemedia-login-block>

Ace Login Block allows you to replace the default WordPress login page with a custom page of your choosing, all designed and managed within the block editor. This lets you create a branded login experience for your users while leveraging the flexibility and ease of Gutenberg.

Features include:

- Replace the default WordPress login page with a custom block-based design.
- Full integration with the block editor, giving you complete control over the login page layout.
- Allow the default WordPress login functionality for POST requests to ensure smooth login submissions.
- Customize redirects and add additional fields or branding elements to the login page.
- Prevent further execution of the default wp-login.php after your custom login template loads.

Ace Login Block provides a seamless way to craft unique, branded login experiences while ensuring compatibility with WordPress's login handling.
