Frontend Admin by DynamiApps

https://wpdemo.net/demos/plugins/acf-frontend-form-element

Add and edit posts, pages, users, terms, ACF fields and more all from the frontend.

(Previously called ACF Frontend)

This awesome plugin allows you to easily display frontend admin forms on your site so your clients can easily edit content by themselves from the frontend. You can create awesome forms with our form builder to allow users to save custom meta data to pages, posts, users, and more. Then use our Gutenberg block or shortcode to easily display these forms for your users.

So, what can this plugin do for you?

FREE Features

1. No Coding Required

   Give the end user the best content management experience without having to know code. It's all ready to go right here.

2. Display Post Data

   Use [frontend_admin field=field_key] to display any field value effortlessly

3. Edit Posts

   Let your users edit posts from the frontend of their site without having to access the WordPress dashboard.

4. Add Posts

   Let your users publish new posts from the frontend using the "new post" form

5. Delete Posts

   Let your users delete or trash posts from the frontend using the "trash button" form

6. Edit User Profile

   Allow users to edit their user data easily from the frontend.

7. User Registration Form

   Allow new users to register to your site with a built in user registration form! You can even hide the WordPress dashboard from these new users.

8. Hide Admin Area

   Pick and chose which users have acess to the WordPress admin area.

9. Configure Permissions

   Choose who sees your form based on user role or by specific users.

10. Modal Popup

    Display the form in a modal window that opens when clicking a button so that it won't take up any space on your pages.

PRO Features

1. Edit Global Options

   If you have global data – like header and footer data – you can create an options page using ACF and let your users edit from the frontend.

2. Limit Submits

   Prevent all or specific users from submitting the form more than a number of times.

3. Send Emails

   Set emails to be sent and map the ACF form data to display in the email fields such as the email address, the from address, subject, and message.

4. Style Tab

   Use Elementor to style the form and as well the buttons.

5. Multi Step Forms

WPDemo - Hosted WordPress demo sites with full admin access, private, temp, Have

Make your forms more engaging by adding multiple steps.

6. Stripe and Paypal

   Accept payments through Stripe or Paypal upon form submission.

7. Woocommerce Intergration

   Easily add Woocomerce products from the frontend.
