

Advanced Access Manager

<https://wpdemo.net/demos/plugins/advanced-access-manager>

Advanced Access Manager (aka AAM) is a WordPress plugin designed to help you control every aspect of your website, your way.

MAIN AREAS OF FOCUS

- Access & Security Policy allows you to define who, when, how and under what conditions your website resources can be accessed;
- Content access control on the frontend, backend and API levels to posts, pages, media attachments, custom post types, categories, tags, custom taxonomies for any role, user and visitors;
- Roles & capabilities management with the ability to create new roles and capabilities, edit, clone or delete existing;
- Access control to backend area including backend menu, toolbar, metaboxes & widgets;
- Access control to RESTful API;
- Developer-friendly API so it can be used by other developers to work with AAM core;
- And all necessary features to setup smooth user flow during login, logout, access denied even, 404 etc.
