

Better Click To Tweet

<https://wpdemo.net/demos/plugins/better-click-to-tweet>

The most popular Click To Tweet Plugin for WordPress (by a mile), for good reason.

Create tweetable content for your readers, using a simple shortcode or Gutenberg block. Readers are encouraged to tweet out both a quote, and a link to your content.

- [Add Premium Styles](#) with just a few clicks.
- Using the shortcode method in the classic editor? See our [Power User Guide](#) for all the tricks (remove or change the “via,” make links nofollow, change the callback URL, and more!).

Why Better?

Back in the day, there was only one or two options for Click to Tweet plugins. They didn't do a lot of things I wanted them to do, so I made this plugin. I'm bad at naming things, so “Better Click To Tweet” it is. Since then, I've made so many changes and enhancements that any resemblance to the original inspiration plugins are long gone.

Developer? Designer? Geek of any sort? Please hop in and suggest improvements. You can create issues or submit pull requests at the [github repository](#) for this plugin.

Translation is managed at [the official WordPress translation page](#).
