Broken Link Checker

https://wpdemo.net/demos/plugins/broken-link-checker

This plugin will monitor your blog looking for broken links and let you know if any are found.

Features

- Monitors links in your posts, pages, comments, the blogroll, and custom fields (optional).
- Detects links that don't work, missing images and redirects.
- Notifies you either via the Dashboard or by email.
- Makes broken links display differently in posts (optional).
- Prevents search engines from following broken links (optional).
- You can search and filter links by URL, anchor text and so on.
- Links can be edited directly from the plugin's page, without manually updating each post.
- Highly configurable.
