Duplicate Post

https://wpdemo.net/demos/plugins/duplicate-post

This plugin allows users to clone posts of any type, or copy them to new drafts for further editing.

If you find this useful, please consider donating whatever sum you choose, even just 10 cents. Just a few cents from every user would help me develop the plugin and improve support.

How it works:

• In 'Edit Posts'/'Edit Pages', you can click on 'Clone' link below the post/page title: this will immediately create a copy and return to the list.

• In 'Edit Posts'/'Edit Pages', you can select one or more items, then choose 'Clone' in the 'Bulk Actions' dropdown to copy them all at once.

• In 'Edit Posts'/'Edit Pages', you can click on 'New Draft' link below the post/page title.

• On the post edit screen, you can click on 'Copy to a new draft' above "Cancel"/"Move to trash" or in the admin bar.

• While viewing a post as a logged in user, you can click on 'Copy to a new draft' in the admin bar.
