

Gallery Plugin for WordPress - Envira Photo Gallery

<https://wpdemo.net/demos/plugins/envira-gallery-lite>

Envira gallery is a drag & drop photo gallery plugin that easy, fast and powerful.

The plugin is highly optimized for web and server performance because the authors understand the importance of speed when it comes to SEO and conversion.

Works great with the top page builders including: Elementor, Beaver Builder, Divi and more. Envira has been downloaded over 3,000,000 times.

DRAG & DROP GALLERY BUILDER

We were tired with the bloated and buggy gallery widgets. That's why we built Envira to adapt to your workflow and allow you to create in minutes.

You can also add gallery blocks built for the new WordPress 5.0 Gutenberg block editor.

MOBILE READY, SEO FRIENDLY AND OPTIMIZED FOR SPEED

Envira is 100% responsive and mobile-friendly by default. We optimized every query on the front-end and the back-end to ensure maximum speed.

Plus, you have the ability for meta data, deeplinks, standalone galleries, and pagination.

SHARING AND SELLING PHOTOS MADE EASY

Social media integrations, image proofing, and WooCommerce store integration.

EASY TO CUSTOMIZE AND EXTEND

You can easily customize with our built-in WordPress templates and layouts or create your own.

But we also knew that our developer friends may want to extend it further. That's why Envira comes with tons of hooks and filters and is very well documented.
