ULTIMATE COMPANY/BUSINESS MANAGEMENT SOLUTION FOR WORDPRESS

SUPERCHARGE YOUR GROWING BUSINESS FROM YOUR WORDPRESS DASHBOARD

WP ERP is the first full-fledged ERP (Enterprise Resource Planning) system through which you can simultaneously manage your WordPress site and business from a single platform.

WP ERP aims to deliver all your enterprise business requirements with simplicity. With real-time reports and a better way to handle business data, make your operation better managed, away from errors, and prepare your company for the next leap.

WP ERP's core version has all the important features you need to manage the basics of your business.

WP ERP has 3 core modules: HR, CRM, and Accounting, which together make a complete ERP system for any type of business.

The plugin is so beginner-friendly that all you need is a one-click activation to get started!

Core Modules

WP ERP Comes with **three** powerful pre-built core modules –

- [WordPress HR Management](#)
- [WordPress CRM System](#)
- [WordPress Accounting System](#)

Other Modules

- Project Management via [WP Project Manager](#)

OUR SPECIALITIES

- WP ERP core plugin is **free**. You only **pay for components, support, and updates**
- **Fast and Real-time**. Even **faster** with a **personal hosting server**
- **Ease of access**. Accessible from **any platform** or **device**
- **Ease of use**. Intuitive and requires almost **no training** for the user
- **Cloud-based**. Never lose data and keep everyone **synced**
- **Secure** according to WordPress standards and **your data stays with you**
- **Lightweight and divided into **Components**. So, companies can **expand** their ERP system in a **step-by-step** process
- **Industry-specific customizations** are readily available and even easier to modify
- **No maintenance** is required
- **Open-source. Development** and **customization** become easy
- **Streamlined** for **Collaboration** and **Teamwork**. Easily **share, track time, and review projects** with co-workers
- **Privacy** at every level of work
- Option to use a built-in **WooCommerce CRM**
- Option to manage **job listings** related works
- **Best accounting component** on the market

Privacy Policy

WP ERP uses [Appsero](#) SDK to collect some telemetry data upon the user's confirmation. This helps us to troubleshoot problems faster & make product improvements.

Appsero SDK **does not gather any data by default**. The SDK only starts gathering basic telemetry data **when a user allows it via the admin notice**. We collect the data to ensure a great user experience for all our users.

Integrating Appsero SDK **DOES NOT IMMEDIATELY** start gathering data, **without confirmation from users in any case**.

All the promotional data for marketing are fetched through REST API from the official website of [WP ERP](#)
