

Image Photo Gallery Final Tiles Grid

<https://wpdemo.net/demos/plugins/final-tiles-grid-gallery-lite>

Image Gallery + Photo Gallery + Portfolio Gallery + Tiled Gallery in 1 plugin.

Includes lightbox and hover effects. It supports Pinterest (masonry) photo gallery and tiled grid gallery.

A BRAND NEW ALGORITHM

Final Tiles Grid Gallery uses a brand new algorithm to make much more interesting image grids, how does it work?

The main concept is very simple: it doesn't crop the images and it keeps the original size (if possible).

This is a completely new way to build photo galleries because now you can think of the images like they were tiles with different sizes, so you can use a bigger size for a cover image, for example.

The image photo gallery is fully responsive and it adapts to the browser using a nice and smooth animation, even on mobile devices because it can use the hardware acceleration taking advantage of CSS3 properties.

This gallery plugin is perfect for you if you need:

- wedding album photo gallery
- designer portfolio photo gallery
- photography portfolio photo gallery
- products showcase photo gallery

FEATURES

- responsive
- 2 available layouts: Tiles and Columns (masonry)
- adjust margin between images
- adjust image rendered size based on current screen size
