FluentSMTP – WP Mail SMTP, Amazon SES, SendGrid, MailGun and Any SMTP Connector Plugin

https://wpdemo.net/demos/plugins/fluent-smtp

WordPress Mail SMTP Plugin For Any Email Services

Are you having problems with your WordPress emails not sending? Or looking to set the email address in which your emails are delivered from. This plugin will solve all your email deliverability problems. FluentSMTP is the ultimate WP Mail Plugin that connects with your Email Service Provider natively and makes sure your emails are delivered .

Our goal is to send your WordPress emails fast, secure, and reach the email inbox.

Fluent SMTP plugin fixes your email delivery issue by connecting WordPress Mail with your email service providers. These integrations are native, so it will send the emails superfast.

Connect as many email Service Providers as you want and FluentSMTP will route your transactional and marketing emails automatically. This is one of the unique features that FluentSMTP has to offer.

Available Email Service Connections

- Email Routing to multiple email connections
- Connect with Any Email Service Providers
- Email Logging and Resend features
- Fallback Email Connection
- Resend Any Emails
- In Details Reporting
- Super fast UI powered by VueJS
-

How does Fluent SMTP works

Fluent SMTP improves your WordPress mail by intercepting the wp_mail and then connecting with your email service providers to ensure deliverability. It uses a direct email service API to send emails faster and securely. It means emails are sent using the provider’s direct API. For your native SMTP connections, It uses the proper host, port, and credentials to send your WP Mails.

Email Logging and Debugging Feature

Fluent SMTP also logs (optional) your emails so you can check anytime and see your site health. You can also resend your failed emails or resend any previous emails from email logs that you need.

AMAZON SES (Native API Connection)

With Fluent SMTP SES Connection, you get the powerful, low-cost, high deliverability managed infrastructure from Amazon. With the support of Fluent SMTP, it’s super easy to set up and configure Amazon SES API and send all your WordPress emails. The integration is with amazon’s latest SES API so your emails will be delivered faster and the right way.

Fluent SMTP optimizes the API connection so it creates CURL-Tunneling to send your emails even faster. With Amazon SES connection, You can send emails faster than any other plugins.

Gmail or Google Workspace (Native API Connection)

Fluent SMTP – WP Mail Plugin provides you options to connect with your Gmail or Google Workspace emails and send emails over their API. It’s fast and secure.

SendGrid API Connection

SendGrid is the leading email sending service provider. You can rely on their globally distributed, cloud-based architecture for sending your WordPress Emails.

With Fluent SMTP, You can set up your SendGrid email service connection API in less than a minute. With this direct API connection, send your WordPress Mails fast and secure way.

Read about SendGrid connection documentation here

Mailgun Email API Connection

Mailgun is another leading email sending service provider and trusted by 225,000+ businesses. You can rely on their globally distributed, cloud-based architecture for sending your WordPress Emails.

Get your message to the right person at the right time with global infrastructure and industry expertise you can rely on.

With Fluent SMTP connection, You can set up your Mailgun email service connection in less than a minute. This is also a direct API connection so it’s faster than their SMTP connection.

MODERN. POWERFUL. SUPER FAST

- Built with VueJS as a Single-page Application
- Super fast and lean interface so anyone can use it without any learning curve
- Super awesome Dashboard with charts, graphs, and stats to show how your emails are doing.

Automatic Email Routing

With Fluent SMTP's unique multiple connection driver features, You can add as many email connections as you want. Based on your From Email Address, Fluent SMTP will route your emails to the appropriate email driver and send them securely. This is one of the unique and useful features that Fluent SMTP offers.

Now, you can route your transactional emails with one connection and marketing emails with another connection.

Email Logs and Reporting

Do you want to know how many and which emails your site is sending? Fluent SMTP got you covered. With powerful and super-fast email reporting and logs, you can easily view your WordPress Emails. You can also view charts and graphs about your daily email stats. Also, you can resend any emails anytime you want. This is super helpful for storing emails for your records, auditing outgoing emails, and debugging during

WPDemo - Hosted WordPress demo sites with full admin access, private, temp, Have

site development.

Optionally, You can turn off this feature, and then only failed emails will be logged so you can take a look. Fluent SMTP uses a custom Database table so your WordPress Tables will not be bloated (we care).

Realtime Notification on Email Failures via Telegram, Slack, and Discord

Fluent SMTP has a unique feature that will notify you in real-time if any email fails to send. You can set up your Telegram, Slack, or Discord channel and Fluent SMTP will send you a notification if any email fails to send. This is super helpful for debugging and monitoring your site's email health.

Security

Fluent SMTP is built by professionals and security and scalability in mind. Fluent SMTP provides several options for you to keep your email sending secure and safe.

One Click Migration From WP Mail SMTP by WPForms

If you use other WP SMTP plugin like "WP Mail SMTP by WPForms", you can just install Fluent SMTP Plugin and migrate the settings by a single click.

- Ability to store your SMTP / API credentials on the wp-config.php file
- Ability to auto-delete old email logs
- Fluent SMTP connects your email service providers directly via API

Credits

Fluent SMTP is built by WPManageNinja LLC. And yes, It's built by the creator of popular plugins like FluentForms, FluentCRM, Ninja Tables.

Fluent SMTP is a 100% free and opensource plugin and we will never release a pro version. It does not mean, It will have lack features. Our aim is to provide the ultimate SMTP/Email Service connection plugin for your WordPress Mails. We wrote an article about why we made this plugin and our plan about Fluent SMTP.

The full source code is hosted in GitHub and you are welcomed to contribute to the development of this awesome WP Mail Plugin.
