GutenBee – Gutenberg Blocks

https://wpdemo.net/demos/plugins/gutenbee

GutenBee is a collection of elegant WordPress blocks enhancing your editing experience in the Gutenberg editor and vastly extending the potential of the new editor experience.

Here's the demo of one of our latest blocks, the Food Menu block

Blocks:

Accordion: Organize your content into accordion elements. All the content including titles can be edited directly in the WordPress editor and you can choose any color combination from the block's settings.

Banner: Create beautiful and flexible banners on your site to capture user attention. Supports video backgrounds.

Buttons: Actionable content needs clickable buttons. Add one or more buttons, tweak their colors, borders and alignment and you're all set!

Container: A powerful container block allowing content grouping or splitting in columns, complete with fully responsive settings.

Countdown: Have an upcoming event? Pick a date directly inside the editor screen, choose your layout, colors, and typography and you're ready!

CountUp: Maybe not every block counts, but this one does! Pick a starting and ending number, add a suffix or prefix, style it and you're done!

Divider: Provide thematic content spacing with a fancy divider, edit its style, colors, and margins.

Food Menu: Display your dishes and drink offerings in a stylish fashion.

Google Maps: Easy-peasy fancy maps with the Google Maps block. Just enter a location and save, it just works! With support for beautiful predefined map styles and Snazzy custom map styles!

Heading: A normal heading block with responsive settings.

Icon: Display icons from a custom designed, curated list of over one hundred icons, with more icons being added in regular updates!

Icon Box: Your standard icon box block on steroids. Choose from over one hundred custom designed icons, style them any way and at any size you like, add some text and you're good to go.

Icon List: Create lists with beautiful icons instead of bullets.

Image: A variation of the core Image block with extra responsive spacing and sizing

settings.

Image Box: A standard image box with title and text block on steroids. Adjust your spacing, layout, alignment, or colors and typography.

Image Comparison: Need to showcase your photo editing skills or writing up a camera review? With the Image Comparison block you can enhance your posts with side-by-side comparison of any two photos you wish.

Justified Gallery: Create beautiful justified grid layout galleries inside any of your post or pages.

Paragraph: A variation of the core Paragraph block with responsive spacing settings.

Progress Bar: Add stylish progress bars and display either progress or your skillset with the most visually captivating way.

Review: Transform any post into a review. Score items individually, and average them out automatically.

Slideshow: Add a fancy slideshow to your posts or pages. Drag and drop your images, choose your settings and hit publish!

Spacer: Complete control spacing of elements in your posts and pages with the responsive Spacer block.

Tabs: Organize your content into fancy tabs. All the content including titles can be edited directly in the WordPress editor and you can choose any color combination from the block's settings.

Testimonial: An easy to use block to help you display your testimonials with multiple layouts.

Post Types: List posts from any post type in a configurable grid, complete with fully responsive settings.

Video: Embed a video from your media library or upload a new one.

Video Embed: Embed videos from YouTube or Vimeo and lazy-load theme if you wish to.
