

Heroic Glossary

<https://wpdemo.net/demos/plugins/heroic-glossary>

Heroic Glossary is the easiest way to create and manage your own glossary of terms.

A glossary helps your audience understand technical terms, acronyms and abbreviations they may not be familiar with. This is perfect if you're writing technical articles or documents using terms that might not be understood by your audience.

Heroic Glossary is a Gutenberg Block which means you can build your glossary right in the editor with a few clicks, it includes the following functionality and features:

- Instant search of the glossary
- Alphabetical navigation
- Create an unlimited number of glossaries
- Re-use glossaries on multiple pages with "reusable blocks"

The Heroic Glossary Block includes a number of configurable settings and predefined styles to customize the display of your glossary.
