Image Hover Effects Ultimate (Image Gallery, Effects, Lightbox, Comparison or Magnifier) is an impressive, lightweight, responsive Image hover effects gallery. Use modern and elegant CSS hover effects and animations. Best Used for portfolio/gallery/image showcase items in WordPress site using shortcodes and custom post. Consider the comfort of developers, we launch an advanced pure CSS3 based hover effect plugin named Image Hover Effects Ultimate (Image Gallery, Effects, Lightbox, Comparison or Magnifier). It is fully responsive. Bring your images to life with some beautiful animation and transition with this awesome plugin.

Hover effect on the image is an important part of creating an attractive and professional looking webpage. With Image Hover Effects or Image Gallery, you can reach your website an apex level of beautifulness. In the past, we had to rely on Javascript for getting those special images hover effect on our webpage. And that was complicated enough as firstly we had to be through complex Javascript coding which could be the scariest thing for some people. And secondly we had to hire an expensive developer for accomplishing this task. It was the biggest problem for non-programming person who wanted to develop their own site for the amateur usage or something like that, such as a personal blog or something that is not much professional, but essential. In those days they had to learn coding even though they didn't want to, or they had to solve the coding stuff by hiring a programmer. For those reasons they had to face much complexities if they want to add a special hover effect, photo gallery or add caption hover to their webpages. But now-a-days plugin like Image Hover Effect brings us the special convenience to add captions hover/image showcase items/image hover in WordPress site using shortcodes and custom post.

Basic Features

- Clone Hover Effects With this plugin you can use the Clone option to copy the styles of the source image to as many images as you need just by one click.
