

Social Feed Gallery

<https://wpdemo.net/demos/plugins/insta-gallery>

Social Feed Gallery is very user-friendly WordPress for Instagram. It was built to simplify the integration with Instagram and reduce the time to have sites updated and to be on track with social media that shows best growing indicators.

This plugin helps to integrate Instagram feed from @ids or #tags inside your WordPress site. Giving the possibility to customize the layout of the display , choosing from gallery or carousel for free version. Adding masonry or highlight alternatives for premium version.

While allowing to set the appearance of display's boxes, images & backgrounds, masks and buttons.

HIGHLIGHTS

- **Simplicity:** Easy to sync up and configure how to display images from your Instagram account.
- **Keep on track:** site update is automated. Caching Images and testimonial data from Instagram.
- **API use optimized:** include features to cache data, to minimize the requests and reduce loading time.
- **Pop-up box:** customizable lightbox to allow users to see your content at your own site.
- **Customization options:** alternatives to change appearance, positioning and layout of your Instagram feed.

INSTAGRAM TOKEN SETUP

Instagram Feed plugin offers you a one-click setup. Discarding the requirement to create any app to do this link, like other plugins do. All you need is to do is add your credentials, and then select an Instagram @id or #tags pictures, by clicking on the "Add New Account" button and your Instagram access token will be automatically generated and saved.
