

MainWP Child

<https://wpdemo.net/demos/plugins/mainwp-child>

This is the Child plugin for the MainWP Dashboard.

The MainWP Child plugin is used to securely manage multiple WordPress websites from your MainWP Dashboard. This plugin is to be installed on every WordPress site you want to control from your Dashboard.

MainWP is a self-hosted WordPress management system that allows you to manage an endless amount of WordPress blogs from one dashboard on your server.

Features include:

- Connect and control all your WordPress installs even those on different hosts!
- Update all WordPress installs, Plugins and Themes from one location
- Manage and Add all your Posts from one location
- Manage and Add all your Pages from one location
- Run everything from 1 Dashboard that you host!
