

MakaPay Payment Gateway

<https://wpdemo.net/demos/plugins/makapay-payment-gateway>

MakaPay Payment Gateway allows you to accept cryptocurrency payments on your WooCommerce store. Customers can pay with USDT, USDC, XRP, TRX and other supported tokens across multiple blockchain networks.

Features

- Accept cryptocurrency payments seamlessly
- Support for multiple blockchain networks (Ethereum, Polygon, BNB Smart Chain, Base, MakaChain)
- Native token support (ETH, MATIC, BNB)
- Stablecoin support (USDT, USDC)
- Real-time price conversion at checkout for native tokens
- Automatic payment verification
- Webhook support for real-time payment updates
- Gasless transactions
- Easy configuration through WooCommerce settings
- Support any custom ERC-20 token on supported blockchains by simply adding the contract address

Supported Networks

- Ethereum (Chain ID: 1) — ETH, USDT, USDC
- Polygon (Chain ID: 137) — MATIC, USDT, USDC
- BNB Smart Chain (Chain ID: 56) — BNB, USDT, USDC
- Base (Chain ID: 8453) — ETH, USDT, USDC
- MakaChain (Chain ID: 777178) — USDT, USDC

Requirements

- WooCommerce 5.0 or higher
- MakaPay account and API key
- Cryptocurrency wallet address

Configuration

1. **API Key:** Get your API key from your MakaPay Dashboard (<https://app.makapay.io>)
2. **Merchant Wallet Address:** Your cryptocurrency wallet address where you want to receive payments
3. **Blockchain Network:** Choose from Ethereum, Polygon, BNB Smart Chain, or MakaChain
4. **Token Contract Address:** Enter the token contract address for your selected network (e.g., USDT, USDC address)

Webhook URL

To receive real-time payment notifications, configure the webhook URL in your MakaPay Dashboard:

<https://yoursite.com/makapay-webhook/>
