

# Restaurant Menu - Food Ordering System - Table Reservation

<https://wpdemo.net/demos/plugins/menu-ordering-reservations>

This plugin is all you need to turn your restaurant website into an online business. Using a simple and friendly interface you get a restaurant menu, online food ordering and restaurant booking system. All free, no fees, no hidden costs, no commissions – for unlimited food orders and restaurant reservations.

It is super easy to set up and there's no coding required. Just follow the wizard, insert the food menu and publish the ordering button. You'll be ready for the first food order within minutes.

## Restaurant menu

- Visual, drag & drop online menu editor
- Support for uploading own images, plus a generous collection of food images available to use
- Customizable food menu items: sizes, choices and add-ons with multiple select
- Suitable for any type of cuisine, including complex pizza or burger menus
- With support for promotions
- Responsive design

## Online food ordering for takeaway / food delivery

- User friendly, single page checkout
- Data auto-fill for returning customers
- Restaurant app for receiving orders (Android / iOS)
- Real time confirmation of the order and fulfilment time
- Different opening hours for pick-up and delivery
- Multiple delivery zones with different minimum order value / delivery fee
- Order for later with scheduled fulfilment
- Cash, online payments (premium feature) and other payment options
- Support for tips (for online payments)

## Restaurant booking system

- Simple restaurant reservation form
- Receive and confirm table reservations from the restaurant app (Android / iOS)
- Order food ahead for dining in

## **The online food ordering system also includes**

- Alerts when the ordering app is not reachable and follow ups call when the restaurant staff is not taking the orders
- Restaurant ordering stats, website analytics, delivery heatmap, exports of clients and orders
- Promotions engine: 11 templates, coupons support, customers segmentation and targeting
- Multi-location support
