

Modula Image Gallery

<https://wpdemo.net/demos/plugins/modula-best-grid-gallery>

With Modula, it's easier than ever to build stunning, masonry grids, lightbox galleries, custom grids and more in no more than a few clicks right from the WordPress dashboard.

Modula is the best WordPress gallery plugin for adding custom, unique and responsive galleries to your website. There is a free version of Modula available (Modula Lite) and a premium version (Modula Pro) both of which will allow you to add amazing, fast-loading galleries to your website.

Galleries created with Modula don't always look identical. With the Modula custom grid functionality, you can easily adjust the size and aspect ratio of each individual image by dragging from the bottom right-hand corner in the gallery edit area.

Custom grids give you greater flexibility over how you display the images on your website. Easily control the size and look of your gallery – choosing the images you want to stand out, rather than relying on an algorithm.

Modula is the most powerful, customizable and easy-to-use WordPress gallery plugin available because we give you the power to choose everything from the height and width of your gallery down to resizing individual images within the container that makes sure your images never exceed the content area.

Modula has been designed to be user-friendly from the ground up so that users of varying WordPress experience can easily create the perfect WordPress photo and image galleries. If you don't want all the customization features, you can leave everything up to the algorithm, and if you do – they're there so you can easily choose gallery size, margins between images, the color and size of captions.

Modula is the best gallery plugin to showcase your:

- architecture work
- artistic, and creative work
- food blogs and restaurant websites.
- pet blog a stylish and unique touch with Modula Grid Gallery
- to create stunning galleries to engage your travel blog or travel agency website's visitors

- if you're a wedding planner, wedding blogger or building your own wedding website.
