Nashenski Commerce

https://wpdemo.net/demos/plugins/nashenski-commerce

Manual (Bulgarian and English)

Nashenski Commerce adds what a Bulgarian online store needs to WooCommerce. Everything runs on your own site: prices, labels and documents are made by your site and sent only to the services you turn on.

Shipping

- Econt, Speedy, BOX NOW and Pigeon Express: to an office, a locker or an address, with search and the courier’s map.
- Live prices with your courier account, or the courier’s public price list. If the courier does not answer, the list takes over, so checkout keeps working.
- Who pays the courier: you, or the customer at delivery, so courier money never passes through your books.
- Waybills for many orders at once, courier requests, tracking links and order statuses that follow the shipment.
- Classic, block and page builder checkouts, multi-step ones included. Shipping options as cards with courier logos.

Documents and Ordinance N-18

- Order documents, invoices and credit notes as PDF, in Bulgarian and English.
- The NRA audit XML file (Annex 38), optionally emailed to your accountant every month.
- Invoice archive, Microinvest Delta export and a custom export builder (CSV, Excel, JSON, XML). Files stay private, never in the Media Library.
- Company invoice fields with the EU VAT number check (VIES), the total in words in euro and a checkout field editor.

More

- Quick order: a short form on the product page and the cart.
- Abandoned cart reminders with an optional single-use coupon (off by default).
- The EU withdrawal function (Directive 2011/83/EU, Article 11a, from 19 June 2026).

- Optional customer checks with nekorekten.com, Connectix and NepoStop before cash on delivery.
- Import from Bulgarisation for WooCommerce, the mreja.net plugins, Drusoft Shipping, Econt Delivery and Speedy Shipping.
- English and Bulgarian.

External services

The plugin contacts a service only for a feature you turn on (a courier, a customer check, the VAT number check). Most need your account; the public price lists and BOX NOW and Pigeon Express location lists do not. A courier's public price list is read only when you press "Check the courier website" and once a week, with a normal page request that sends nothing else.

- Econt (shipping): prices, labels, offices, cities, shipment status and courier requests. Sends the receiver's name, phone, address or office, the parcel details and the cash on delivery amount when prices or labels are made. Hosts: ee.econt.com, demo.econt.com. Price list: admin-ee.econt.com (tariff PDF). Terms , Privacy policy
- Econt office map: shown at checkout only when the customer presses "Choose on the map". The map page loads from officelocator.econt.com with the customer's town and the store address. Terms, Privacy policy
- Speedy office map: like the Econt map, from services.speedy.bg, with Google Maps. Only the Speedy town number is sent. Terms, Privacy policy, Google Maps terms, Google privacy
- Speedy (shipping): same purpose and data. Hosts: api.speedy.bg, services.speedy.bg. Price list: services.speedy.bg/pricelist. Terms, Privacy policy
- BOX NOW (locker shipping): lockers, labels and status. Sends the receiver's name, phone, email and locker, the parcel details and the cash on delivery amount when a label is made. Hosts: api-production.boxnow.bg, api-stage.boxnow.bg, locationapi-production.boxnow.bg, locationapi-stage.boxnow.bg (locker list, nothing sent). Terms, Privacy policy
- Pigeon Express (shipping): offices, lockers, prices, labels and status. Hosts: api.pigeonexpress.com, api-demo.pigeonexpress.com. Without a login, checkout loads the public office and locker list from pigeonexpress.com/api/locations (nothing about the customer is sent). Price list: pigeonexpress.com/prices-and-taxes. Terms, Privacy policy
- nekorekten.com (customer check): sends the customer's phone number to look up reports, and, only when you click "Send report" on an order, the report with that order's name, phone and email (later edits and deletes too). Host: api.nekorekten.com. Terms, Privacy policy

WPDemo - Hosted WordPress demo sites with full admin access, private, temp, Have

- Connectix (customer check): sends the customer’s phone number to check their delivery record, and shipment data when tracking is on. Hosts: api.connectix.bg, api-sandbox.connectix.bg. Terms, Privacy policy
- NepoStop (customer check): sends the customer’s phone number, and labels when that option is on. Host: nepostop.com. Terms, Privacy policy
- EU VIES (VAT number check): sends the VAT number a company customer enters at checkout. Host: ec.europa.eu. Website, Legal notice, Privacy policy
