

Orbisius SEO Editor

<https://wpdemo.net/demos/plugins/orbisius-seo-editor>

Orbisius SEO editor aims to be a universal SEO editor for meta titles and descriptions regardless of the SEO plugin or theme you're currently using.

Allows you bulk edit meta Titles and Descriptions of your pages, posts or WooCommerce products.

We support lots of plugins and themes.

The plugin will read the meta title and description even if the supported plugin is not installed anymore.

Features / Benefits

- Manage SEO of your site from one single page.
- Export a selection into Excel (CSV), modify it and then upload the modified file.
- Allows you to quickly update meta title and description for various supported plugins even if you don't have them installed or activated anymore
- You can search for a specific post, page or WooCommerce product ID or keyword
- Smart update: if properties weren't changed it won't do an update to save server resources
- Search by post status: Published, Draft or Pending Review
- You can quickly navigate to the public link of the edited object or edit it within the WP admin.
- WordPress Roles: Editor or Admin can edit the meta/SEO fields
- Loads minimal files when the plugin is not running. Doesn't load at all for WP Heartbeat requests.
- Secure and efficient

Pro version:

If you'd like more features and you should check the Pro version.

It builds on top of the free version. It supports more SEO plugins, themes and more fields.
