MicroPayments – Fans Paysite: Paid Creator Subscriptions, Digital Assets, Tokens Wallet

https://wpdemo.net/demos/plugins/paid-membership

Revolutionize how you monetize content with the MicroPayments – Fans Paysite plugin. This versatile solution empowers creators to sell subscriptions, manage digital assets, and operate seamless transactions via an integrated tokens/credits wallet system. Supports all major payment gateways with WooCommerce token packages, ensuring a frictionless payment experience. Perfect marketplace services for authors, educators, and digital artists looking to maximize their earnings through paid memberships and content sales.

Benefits

- Flexible Monetization: Offer creator subscriptions, pay-per-view content, and memberships tailored to various creator needs.
- Direct Content Sales: Creators can directly sell access to posts, videos, downloads, live video streams, enhancing revenue opportunities.
- Versatile Payment Integration: Supports all major gateways with WooCommerce, including PayPal, Stripe, CCBill for broad accessibility.
- Reduced Transaction Fees: Streamline finances with microtransactions that cut down on costs.
- Dynamic Wallet System: Enables secure, in-site transactions with internal credits and support for other popular wallets like TeraWallet and MyCred.
- Enhanced User Engagement: Features like crowdfunding and donations add interactive elements to content monetization.
- Comprehensive Admin Control: Manage access, monitor transactions, and customize content offerings with ease.
- BuddyPress Integration: Enhances community features, allowing for real-time updates and user interactions within the platform.

Key Features

- 3 Wallet Tokens/Credits supported: internal, TeraWallet (for WooCommerce), MyCred
- Tokens for micropayments can be purchased using multiple payment gateways like Paypal, Stripe, Skrill (Moneybookers) NETbilling, CCBill, BitPay (bitcoin) or earned with site activities, depending on setup.
- Authors/creators can sell subscriptions to their content: users can subscribe to authors for a recurring fee (per author) for access to their content
- Webmaster can manage access to content (including pages, posts, customizable post types) by membership/role.
- Authors/webmasters cans sell access to digital content (posts, custom posts as videos, pictures, documents, chat rooms)
- Webmaster can Sell Site Membership: Users can obtain site roles (membership) by purchase or subscription.
- Edit content page in frontend for authors to be able to manage individual post items (integrates automatically with VideoShareVOD videos, Picture Gallery pictures, PaidVideochat webcam rooms).
- 3 paid content options: internal handler, WooCommerce product, MyCred Sell Content
- Comment restrictions: also hide comments with paid content, limit comments per user (per post) except author, coauthors
- WooCommerce content product: setup WC products that need to be purchased for access to post contents (for using with cart)
- BuddyPress / BuddyBoss activity updates for new products, subscriptions, donations
- My Content purchase list shortcode and page, showing all purchased products; products include button to access content
- Multi wallet support (MyCred + TeraWallet WooCommerce)
- Custom token packages as WooCommerce products
- Wallet user page with shortcode [videowhisper_my_wallet]
- Membership upgrade page with shortcode [videowhisper_membership_buy]
- Downloads management: Digital media downloads
- Donations/crowdfunding

Author Subscriptions

- Authors can setup multiple subscription tiers (limited by webmaster settings), with custom label, description, duration (monthly, yearly, one time payment)
- Authors can assign their content to subscription tiers
- Clients can subscribe to author subscriptions, for access to their content

[WPDemo - Demo sites with admin access so your potential customers can try your](#)

- Optionally, each item accessible by subscription can also be provided for a price per item, for users that don't want to subscribe
- Customizable author earning ratio for subscription earnings
- BuddyPress/BuddyBoss activity updates when users subscribe to authors
- BuddyPress/BuddyBoss user tab with available subscriptions
- [Fans Paysite](#) – Turnkey Fans Monetization Business Platform

Paid Content: Posts as Digital Products

- Content page aggregates the digital content (post types) available for sale.
- Content types is configurable from MicroPayments settings, as custom posts types available for sale: videos, pictures, downloads, webcam rooms.
- My Assets page enables providers to manage their content and set prices.
- My Content page enables clients to access content they previously purchases.
- Content Upload page enables providers to upload videos, pictures and documents from a single form (integrates Downloads, Video Share VOD](https://wordpress.org/plugins/video-share-vod/ "Video Share / Video On Demand Script"), [Picture Gallery](#))
- Content (custom posts) configured with price, can be sold with the WooCommerce integration as products and clients have to purchase the associated product to get access to that content.
- Custom activity updates to BuddyPress/BuddyBoss/PeepSo with multiple asset mentions, including thumbnails
- BuddyPress/BuddyBoss user tab with author content
- Customizable author earning ratio for content sale earnings
- Moderator roles can access content without paying
- Also hides comments with paid post contents (configurable)
- Coauthors: Asset owner can add coauthors to their assets (posts) and share earnings with them (configurable), access to content/comments

[WPDemo - Demo sites with admin access so your potential customers can try your](#)

Downloads: Downloadable File Management

- Enable file uploads from backend and frontend (with publisher access list)
- Restrict access by membership roles
- Sell downloads per item (as WooCommerce products or MyCred Sell Content addon)
- Restrict allowed extensions (server side)
- Obfuscated file name on server to prevent naming exploits

Recommended for use with these solutions

- [Paid VideoChat](#) – Pay Per Minute Videochat site solution.
- [Video Share VOD](#) – Video Share / Video On Demand site solution.
- [Broadcast Live Video](#) – Broadcast Live Video Channels site solution.
- [Picture Gallery](#) – Picture Gallery – Frontend Image Uploads, AJAX Photo List.

Benefits of using tokens include:

- less transaction fees (clients fund their account once for multiple purchases)
- cost control (clients can have added peace of mind and sensation of control for the fixed amount they pay),
- payment in advance (clients prepay for future services) ,
- increased sales (once the have the tokens they will put them to use faster than real money)
