

# PeepSo

<https://wpdemo.net/demos/plugins/peepso>

PeepSo allows you to quickly and easily add a social network or an online community right inside your WordPress site.

PeepSo is a collection of four essential PeepSo plugins: Photos, Media, Friends and Chat together with our Gecko Theme, all of which used to be exclusive to paid PeepSo Bundles. This Bundle is completely free: it's not a time limited trial, and it does not require a credit card or even giving us your email. Just what you need to get started. Completely free, no strings attached.

## Online Community

With PeepSo you can create a complete & beautiful community. Users can write Posts on Activity Stream and Profiles. Comments under Posts are nested so your users never lose track of the conversations.

Users can set their own avatars and cover images. Profiles come with custom fields that users can fill in with information about themselves.

- Activity Stream
- Customizable Profiles
- File Uploads
- Photos & Albums
- Polls
- User Blog Posts
- Groups
- Real-time Chat
- Live Notifications
- Audio & Video
- Friends & Followers
- Hashtags
