

# Post Types Order

<https://wpdemo.net/demos/plugins/post-types-order>

A powerful plugin, Order Posts and Post Types Objects using a Drag and Drop Sortable JavaScript capability.

The order can be customized within default WordPress post type archive list page or a separate Re-Order interface which display all objects.

It allows to reorder the posts for any custom post types you defined, including the default Posts. Also you can display the posts within admin interface sorted per your new sort. Post Order has never been easier.
