User Profile Builder – Beautiful User Registration Forms, User Profiles & User Role Editor

https://wpdemo.net/demos/plugins/profile-builder

Profile Builder is the all in one user profile and user registration plugin for WordPress.

Elegant and reliable user registration and user profile plugin for creating front-end user registration, login and edit profile forms with custom fields.

It also lets you **restrict content** based on user role or logged in status and manage user roles and capabilities using the built in **Role Editor**.

Elevate your user experience and boost sign-ups with beautiful GDPR-compliant registration and login forms, customized user profiles, and all the user management tools you need in one robust solution.

Professionally Designed Login and Registration Forms

Personalize your website by incorporating front-end user login and user registration forms, providing users with a convenient way of signing up or accessing their profiles. This is ideal for:
* Online Communities & Associations
* Online Courses
* News and Resource Websites

Modern and Elegant User Profiles, Listings, and Directories

From creating user profiles and a member directory to listing job offers or your community services, Profile Builder gives you the tools you need to monitor your users, control how and where they log in, as well as implement security measures to protect all those involved. This is ideal for:

* [Business Directory](#)
* [Member Directory](#)
* Job Boards
* Consultancy Services

Lock Your WooCommerce Shop and Content for Members Only

Take control of user access throughout your website, define users' viewing permissions, and regulate their ability to purchase your products. You can do this based on user role or logged-in status, and you can also manage user roles and capabilities using the built-in role editor. This is ideal for:
* Private Websites
* [Private Content](#)
* [Private WooCommerce Stores](#)
* Members-Only WooCommerce Stores

How to Add User Registration, Login, User Profile and Password Recovery Forms

You can use the following shortcode list or available plugin blocks to quickly display the user forms on your website:

- **[wppb-register]** – to register users via a front-end register form that you can customize with .

Profile Builder in your Language

We're focusing on translating Profile Builder in as many languages as we can. So far, the translations for 17 languages are almost complete, but we still need help on a lot of other languages, so please join us at translate.wordpress.org
You will be able to download all the **[available language packs](#)** as well as help us translate Profile Builder in your language.
For more information please visit **cozmoslabs.com**

NOTE:
This plugin adds/removes user fields in the front-end. Both default and extra profile fields will be visible in the back-end as well.
