

# Reusable Blocks Extended

<https://wpdemo.net/demos/plugins/reusable-blocks-extended>

Extend Gutenberg Reusable Blocks feature with a complete admin panel, widgets, shortcodes and PHP functions.

This plugin extends the Reusable Blocks admin interface and provides few fancy features:

- Add Reusable Blocks dashboard information
- Activate Reusable Blocks admin screen
- Provide a list of Posts where each Reusable Block is used and the date it was last modified
- Provide a **live preview of your reusable blocks** from the Reusable Blocks admin screen, with your theme stylesheets
- Provide a Reusable Blocks Widget to use your block anywhere you want in your theme's widgets areas
- Provide a Reusable Blocks Shortcode to use your block anywhere you want in your Post types (even if they use the Classic Editor rather than Gutenberg!)
- Provide some Reusable Blocks PHP functions to use your block anywhere you want in your theme
  
- NEW: An easy tool to convert reusable blocks to block patterns in one click!

For a full presentation of Reusable Blocks Extended, see this [WordCamp Talk synthesis available on my blog](#).
