

Search & Filter

<https://wpdemo.net/demos/plugins/search-filter>

Search & Filter is a simple search and filtering plugin for WordPress – it is an advancement of the WordPress search box.

You can search by Category, Tag, Custom Taxonomy, Post Type, Post Date or any combination of these easily to really refine your searches – remove the search box and use it as a filtering system for your posts and pages. Fields can be displayed as dropdowns, checkboxes, radio buttons or multi selects.
