

Simple Job Board

<https://wpdemo.net/demos/plugins/simple-job-board>

Looking for an easy, user-friendly and robust Job board plugin?

Simple Job Board by [PressTigers](#) is an easy, light weight plugin that adds a job board to your WordPress website.

This plugin is extendible and easy to use. A customized job board is created to manage various job openings via WordPress with the Simple Job Board. You can add multiple job listings and can show them on any page by inserting [jobpost] shortcode. You can add multiple job features and customized application forms for every distinct job post. You can also add notes to an application right from the dashboard.

Shortcode

[jobpost]

Mobile App

Manage your Job Board from anywhere with the Simple Job Board mobile app on [Android](#) and [iOS](#).

Configurations & Templates

Follow the following steps for a fully functional Job Board:

1. After installation, go to "Job Board" menu in the admin panel, and add a new job listing.
2. Add multiple job features and a fully customized application form right from the job listing editor.
3. To list all the job listings and start receiving applications, add [jobpost] shortcode in an existing page or add a new page and write shortcode anywhere in the page editor.
4. After someone fills an application form from the front-end, you will receive it right in the dashboard.

5. You can add special notes to an application by opening its detail page.

Job Board Templating

The job board templating feature allows you to change the following file templates. We are providing two UI layouts named as Classical and Modern.

1. For modifying classical layout templates, please refer to v1 directory.
2. For modifying modern layout templates, please refer to v2 directory.
3. To change a template, please add “simple_job_board” folder in your activated theme’s root directory.
4. Add your file from plugin simple-job-board >templates folder keeping the same file directory structure and do whatever you want. Please exclude “templates” while making the directory structure in your theme.

Enjoy your work with Simple Job Board templating.
