

Specific Content for Mobile

<https://wpdemo.net/demos/plugins/specific-content-for-mobile>

Specific Content For Mobile allows you to create specific content of pages and posts for the mobile version.

It's perfect if you have a couple of pages where you want to remove some fat content or different content.

The best way to have a mobile version is always a fully responsive design, but sometimes for a couple of pages, you may need to have different content. In all those cases, you will find useful Specific Content For Mobile.

To add or remove specific content for the mobile version of your pages, follow these steps:

click on Pages in the main admin menu

go with your mouse on the page you want to modify for the mobile version and click on the action link "Create mobile version", or click on the icon "+" you see in the devices column

modify your page as you want to see it on mobile

save your page mobile version
