

WC Key Manager - Effortlessly sell license keys, game keys, pin codes, gift cards, and more with WooCommerce

<https://wpdemo.net/demos/plugins/wc-key-manager>

[WC Key Manager](#) is a WooCommerce plugin for selling and managing license keys, game keys, pin codes, gift cards, serial numbers, and other items. It provides a complete solution for generating, activating, and checking keys.

[Update to Pro](#) [Live Demo Site](#) [Plugin Documentation](#)

WHAT YOU CAN SELL USING WC KEY MANAGER:

- Software licenses, WordPress plugins, WordPress themes
- Game keys, gift cards, pin codes, serial numbers, activation codes
- Username and password, access codes, membership keys
- Online courses & Professional services (Tutorials, Coaching, Consultations)
- Any other digital or physical products that have a key or activation code
- And many more.

HOW IT WORKS:

1. Create a product in WooCommerce and configure it as a key product.
2. Add keys for the product or let the plugin generate them automatically.
3. When a customer places an order and completes the payment, the plugin automatically sends the key for that product.

WC KEY MANAGER FEATURES:

- Sell either preset keys or automatically generate keys according to your requirements.
- Generate random or sequential keys and set the amount of keys to deliver per quantity of ordered product.
- Generate keys individually or in bulk or import them from a CSV or text file.

- Complete control of automatic key pattern. Customize the format of the keys as needed.
- Assign keys to orders manually or automatically and perform bulk key assignments.
- View, edit, and delete keys and search for keys based on key value, order ID, or product ID.
- Set specific key expiry dates or relative dates from the order date or make it never expire.
- Limit how many times your customer can activate the keys or allow unlimited activations.
- View the usage history of keys, including activation date, activation count, and user information.
- Reuse keys from canceled or refunded orders and make them available for reassignment.
- Automatically deliver keys to customers upon order completion or payment confirmation.
- Complete control of where to show the key and where not to show the ordered keys based on your requirements.
- Automatically manage stock levels based on key availability for key-based products.
- Customers can view their keys on the My Account page. Allow them to activate or deactivate their purchased keys.
- Define key patterns for generating keys with specific formats, such as alphanumeric, numeric, or custom patterns.
- Manage keys via the REST API to integrate other systems or services.
- Roll out automatic plugins, themes, or any software update, and manage changelog.
