

Brevo (formely Sendinblue) for WooCommerce

<https://wpdemo.net/demos/plugins/woocommerce-sendinblue-newsletter-subscription>

Brevo's plugin for WooCommerce is the easiest way to integrate your store and send better communications.

Trusted by over 400,000 businesses worldwide, [Brevo](#) is an all-in-one marketing platform for engaging with your contacts and building better customer relationships through targeted and meaningful communication.

Cover your entire marketing funnel with one single tool:

- **Contacts** — Sync your customers and new subscribers to grow your list and store with free unlimited contacts storage.
- **Email marketing** — Engage customers with beautifully designed email campaigns created in an intuitive drag-and-drop email editor or using our rich text or HTML options.
- **Segmentation** — Target your campaigns with precision thanks to our powerful contact segmentation engine based on purchase history.
- **Automation** — Use triggered emails to connect with customers who visited your website or left an item in their cart. Automatically follow up post-purchase via email and/or SMS. Design intricate marketing automation workflows in our visual editor.
- **Conversations** — Stay connected with your audience and divide communication tasks among team members using Chat, CRM and Push Notification features. You can use it as a CRM for WooCommerce, tracking orders and automatically syncing payment transactions.

How to get started

1. Install, and activate the plugin in your WooCommerce store.
2. Create a Brevo account or log into an existing account.
3. Sync WooCommerce data to Brevo (lead and/or customer).

After you sync your historical and new WooCommerce store data with Brevo to better manage your customers and their orders, you can deploy effective email and SMS campaigns, improve transactional email deliverability, and track detailed metrics including delivery, open and click rates.

Email Marketing

Promote your brand and grow your business with beautifully designed emails. Our easy to use template builder allows you to create personalized messages and build meaningful relationships with your contacts.

Email Marketing features:

- Create WooCommerce email templates that look great on every device. Using our drag-and-drop email editor, you can quickly create beautiful, responsive emails and personalize them to showcase your business and keep subscribers in the loop about new product launches, promotions, blog posts, and more. Choose one of Brevo's 40+ pre-designed [templates](#) — all you have to do is add your content and send.
- Send personalized newsletters and promotional email campaigns to your subscribers.
- Send confirmation emails with optimized deliverability.
- Use WooCommerce order variables directly within your Brevo email templates.
- Monitor the most important email metrics: delivery, open and click rates.
- Enable and manage customer subscriptions: opt-out, opt-in, or double opt-in after order creation or completion.
- Order tracking: transactional data (order ID, price, etc.) is saved in Brevo to enable powerful segmentation.
- Create and send confirmation text messages after key events like new order or order shipment.
- Send text message campaigns to all customers or subscribers.
